

## CORRUGATED METAL ROOFING AND SIDING PANELS

**STEEL CITIES STEELS** offers a full range of industrial corrugated roofing and siding panels. Onsite services such as panel measurement, material identification, sample drop off and color charts are also available. Please consider us for your next project.

The 2.67" x 1/2" panel is the most common corrugated metal used today. The 2.67" Denotes the distance from the center of one ridge to the center of the next. The overall height is 1/2". The 2.67"X3/4" and 2.67"X7/8" panels offer a deeper groove for a more pronounced corrugated style.

Galvanized g90 is the standard finish. Most corrugated metal used today for roofing and siding is made with this type of finish. A plain carbon sheet is coated with a barrier of zinc on both sides to insulate it from the elements. This makes the panels extremely durable and allows them to last many years. Corrugated metal can also be provided in smooth aluminum 3003 and stucco embossed aluminum 3003, stainless t304 and t316, and a painted finish (standard is kynar).

### CORRUGATED ROOFING AND SIDING SIZES AVAILABLE:

Finish Size	(Center/Center of Ridge X Height)	Thickness	Widths*	Lengths**
Galvanized G90	2.67" x 1/2", 2.67" x 3/4", 2.67" x 7/8"	18, 20, 22, 24, 26	Please Inquire	Cut to Specifications
Painted	2.67" x 1/2", 2.67" x 3/4", 2.67" x 7/8"	18, 20, 22, 24, 26	Please Inquire	Cut to Specifications
Aluminum 3003 Smooth Finish or Stucco	2.67" x 1/2", 2.67" x 3/4", 2.67" x 7/8"	.032, .040, .050, .063	Please Inquire	Cut to Specifications
Stainless T304 or T316	2.67" x 1/2", 2.67" x 3/4", 2.67" x 7/8"	16, 18, 20, 22, 24	Please Inquire	Cut to Specifications

\*Widths depend upon available coils at time of quote/order

\*\*Lengths can be cut to your specifications out of a coil
